Tragic. He sits there for hours, so
the bench cannot be used by others. Precisely
the reason why removing the bench
is needed.

He has housing and goes home every day. He stays in the veterans shelter. He just comes to the bench and sits. We
make him several times a day. If he stays awake he is not breaking any laws. It is a tough thing to deal with for sure.
PATH checks on him weekly to make sure he is ok health wise.

Same man. He is dirty and smells of urine, thus preventing others from using the bench. Looks like he was recently hospitalized.
